

Accelerator ACCEL[®] – EM33

NON BLOOMING ONE PACK BLENDED ACCELERATOR FOR EPDM

Accel EM33 is blend of Thirums, Dithiocarbamates etc.

Characteristics:- ACCEL-EM33 is a Accelerator for use in EPDM. No effect on scorch and also provides high speed of cure and gives excellent vulcanizate properties. EM33 also inhibits Blooming and Staining. Generally 2-3 Accelerators are used for EPDM curing, while ACCEL-EM33 alone is enough to produce good results of vulcanization, without complexity and errors which may occurred during handling many Accelerators. ACCEL EM33 is easy to handle as readily disperses in rubber compounds.

Appearance: Yellowish brown powder.

Melting Point: 65°C min.

Dosage (phr):- 2 – 5 phr.

Application: - Every type of EPDM products including Goods.

Packaging: - 20Kgs. Net in paper bag.

SUSTAINING ORIGINAL SHADE (COLOUR) OF YOUR PRODUCT HIGH CURE RATE SIMPLE DESIGN CURE SYSTEM.
