

Phthalate Free Plasticizer

CCP CIZER D190 (Adipate Polyester)

DESCRIPTION

CCP D190 is a **Lower Viscosity Polymeric Plasticizer**, achieving a easy handling and processing performance that can be used for non-phthalate requirement product.

Good High Temperature Resistance, good Low Temperature properties and low volatility of D190 make it a highly desirable plasticizer for PVC.

Typical Physical Properties

Average molecular weight	:	ca.800
Color (APHA)	:	60
Specific gravit (y25)	:	1.02-1.04
Refractive index (25°C)	:	1.455-1.465
Viscosity (Cps/25°C)	:	200-250
Acid value	:	<0.6
Water content %	:	<0.1

Applications

As Non-Phthalate plasticizer for PVC product trend is gradually widen, CCP D190 is one of the best choice can fully satisfy customer's requirement
CCP D190 with excellent physical and chemical property can be used for applications such as Medical Glove, Sheeting, Leather Cloth and Children Toys product..

CCP D190 also successfully substitute DOP in some Rubber Industry because of it's good Heat and Cool Resistance Property.
