

PRECIPITATED BARIUM SULPHATE (BaSO₄)

Precipitated Barium Sulphate is an inert white filler, resistant to acid and alkalis, and has very good weathering resistance. It does not absorb light from the ultraviolet to the infra-red range and so does not impair the brilliance of colour pigments. Particle sizes range from 0.7 to 3.0 µm.

White mineral filler for Fluoroelastomers. BaSO₄ can be used along with Color Pigments for to make Color Compound of FKM.

Product Specification :

Item	Unit	Specification
Moisture	%	0.30 max
BaSO ₄	%	97.0 min
Free Alkali (as Na ₂ O)	%	0.04 max
Water - Soluble Matter	%	0.40 max
Residue on Sieve (45 µ)	%	0.40 max
